Investment Objective

The Fund will aim to deliver income and capital growth, net of fees, on a total return basis whilst providing investors with exposure to a diversified portfolio invested in an ethically conscious way following the Investment Managers' ethical investment policy.

Investors should be aware that there is no guarantee that this objective will be achieved and capital is at risk.

The Fund may invest in a broad range of asset classes including fixed interest (approx. 10-40%) e.g. corporate & government bonds (which may include investment and sub-investment grade bonds), debentures and equities (approx. 50-80%). The Fund may also invest in property REITs as well as money market instruments, deposits, warrants, cash and near cash. Exposure to these asset classes (between 80-100%) will be gained primarily through the use of collective investment schemes although the Fund may also invest directly.

In addition, the Fund will aim to support enterprises who are actively working to address global warming issues, as detailed in the "Non-Financial Objectives" below.

Non-Financial Objectives

The Fund will invest in assets that meet the requirements of the Investment Managers' ethical investment policy. The ethical investment policy seeks to identify funds or direct investments subject to robust ethical investment policies. Funds and directly held assets must pass a due diligence process designed to assess their ethical credentials. For funds, ethical due diligence includes: collection of documents from the fund provider explaining the process and policies used by the fund manager; fund manager interview; follow-up actions. Areas covered include: adherence to minimum requirements; assessment of exclusions; assessment of engagements carried out; assessment of other policies used (including but not restricted to best-in-class approaches, positive screening, integrated ESG approaches, impact investing approaches); commitment to ethical and sustainability issues; experience and qualifications of fund management staff; evidence supporting fund manager claims; follow up information provided.

The Investment Manager's ethical investment policy is subject to continuous improvement under the guidance of our external ethical oversight committee.

The Fund will aim to support companies who are actively working to address global warming issues. It will do this by focusing on fossil divested investments, renewable energy assets, and through investment in funds that lead companies to achieve net-zero emissions.

Measure	Definition	Target	Status
Fossil divestment	Percentage of fund assets in fossil divested investments	100% at launch and thereafter	100%
Investment in renewable energy	Percentage of fund assets invested in renewable energy assets	10% at launch and thereafter	14.6%
Leading companies to achieving net zero emissions as quickly as possible	Percentage of fund assets invested in funds that have adopted the carbon-neutrality objective below; or an objective we consider to be equivalent, or better. The carbon-neutrality objective has a focus on promoting a net-zero economy by 2030.	25% at launch and thereafter, rising to 85% by 2030.	27.0%

Fund Update

With the holiday season at its peak in August, markets were subdued. Major equity indices only fluctuated by 2-3% during the month, ending slightly higher. As traders return to their desks (even virtually) volatility may increase over the coming month. Potential catalysts for a move are already present, with slowing global growth, tighter monetary policy, and inflation all areas of concern.

Chinese equities continued their period of underperformance in the month. Regulatory intervention across a number of industries has spooked both domestic and international investors. The Chinese authorities have been looking to address growing inequality and uneven growth by directly and indirectly addressing large companies in key sectors. The most prominent of these has been the technology sector, which makes up a large part of the equity market and are dominant in overseas listings. While it is unlikely that the government will want to overly impede their national champions, they have shown willingness to instruct companies to change their behaviour, which is likely to weigh on investor confidence for some time. This does not remove prospect of strong returns from Chinese equities, which are now relatively cheap and continue to have good growth prospects driven by increasing domestic consumption. However, there is now clearly an elevated risk from government intervention for which investors will demand a premium.

Elsewhere, inflation watchers were unsurprised by the 5.4% reading for July CPI in the US, which was consistent with expectations as well as the previous month's figure. While some elements of the headline figure have begun to roll over, high contributions from second-hand cars and energy continued to have a heavy impact. Furthermore, supply chain disruptions and labour shortages were applying some upward pressure. In the UK the rate dropped back to 2% down from 2.5% and below expectations of 2.3% as clothing reductions weighed on the figure. Nevertheless, inflation readings in the UK are expected to rise before peaking around the New Year at over 3%. The key over the coming months will be to what extent is the rising inflation entrenched in the labour market, and any central bank reaction to such a situation. Markets are already becoming accustomed to the potential of higher rates, but any increase in the expected pace of monetary tightening will lead to bond market volatility.

During the month we added to Alquity Asian Equity, following weakness in Asian equities. Elsewhere, we reduced the Civitas holding as the share had seen strong performance and move to a significant premium, leading us to suspect an equity raise. However, weakness towards the end of the month allowed us to reinvest below NAV, confident that this was no longer likely. We continue to temper our UK equity bias, in favour of global equities. This will continue gradually going forwards.

TM P1 Sustainable World Fund

* The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF excludes portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term.

** These are the annual costs of running and managing the Fund.

Risk Warnings

The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved. Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

The Fund has a concentrated portfolio (holds a limited number of investments) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.

Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

Important Information

P1 Investment Management Limited is authorised and regulated by the Financial Conduct Authority, Firm Reference Number 752005. P1 Investment Management Limited's registered office is Senate Court, Southernhay Gardens, Exeter, Devon, EX1 1NT, company number 09810560. This document does not constitute an offer or invitation to invest, nor should its contents be interpreted as investment advice, for which you should consult a financial adviser. The information and opinions contained herein have been compiled or derived from sources believed to be reliable at the time of publication and are given in good faith. No representation is made as to the accuracy, completeness or correctness of any information in this document.

Any opinion expressed, whether in general, on the performance of individual securities, or in a wider economic context, represents the views of P1 Investment Management Limited at the time of publication and these views are subject to change.
