Investment Objective

The Fund will aim to deliver income and capital growth, net of fees, on a total return basis whilst providing investors with exposure to a diversified portfolio invested in an ethically conscious way following the Investment Managers' ethical investment policy.

Investors should be aware that there is no guarantee that this objective will be achieved and capital is at risk.

The Fund may invest in a broad range of asset classes including fixed interest (approx. 10-40%) e.g. corporate & government bonds (which may include investment and sub-investment grade bonds), debentures and equities (approx. 50-80%). The Fund may also invest in property REITs as well as money market instruments, deposits, warrants, cash and near cash. Exposure to these asset classes (between 80-100%) will be gained primarily through the use of collective investment schemes although the Fund may also invest directly.

In addition, the Fund will aim to support enterprises who are actively working to address global warming issues, as detailed in the "Non-Financial Objectives" below.

Non-Financial Objectives

The Fund will invest in assets that meet the requirements of the Investment Managers' ethical investment policy. The ethical investment policy seeks to identify funds or direct investments subject to robust ethical investment policies. Funds and directly held assets must pass a due diligence process designed to assess their ethical credentials. For funds, ethical due diligence includes: collection of documents from the fund provider explaining the process and policies used by the fund manager; fund manager interview; follow-up actions. Areas covered include: adherence to minimum requirements; assessment of exclusions; assessment of engagements carried out; assessment of other policies used (including but not restricted to best-in-class approaches, positive screening, integrated ESG approaches, impact investing approaches); commitment to ethical and sustainability issues; experience and qualifications of fund management staff; evidence supporting fund manager claims; follow up information provided.

The Investment Manager's ethical investment policy is subject to continuous improvement under the guidance of our external ethical oversight committee.

The Fund will aim to support companies who are actively working to address global warming issues. It will do this by focusing on fossil divested investments, renewable energy assets, and through investment in funds that lead companies to achieve net-zero emissions.

| Measure | Definition | Target | Status |
|--|--|--|--------|
| Fossil divestment | Percentage of fund assets in fossil divested investments | 100% at launch and thereafter | 100% |
| Investment in renewable energy | Percentage of fund assets invested in renewable energy assets | 10% at launch and thereafter | 14.8% |
| Leading companies to achieving net zero emissions as quickly as possible | Percentage of fund assets invested in funds that have adopted the carbon-neutrality objective below; or an objective we consider to be equivalent, or better. The carbon-neutrality objective has a focus on promoting a net-zero economy by 2030. | 25% at launch and thereafter, rising to 85% by 2030. | 26.6% |

Fund Update

Reports of the recently named Omicron variant discovered in South Africa and its rapid spread to Asia and Europe have quickly soured market sentiment, which, until the final few days of the month, was cautiously optimistic. While little is known about the true danger of this variant, reports of the number of mutations and that it is more transmissible have caused alarm. Global governments reacted rapidly, particularly towards travel. Israel and Japan were among the most extreme examples, where most international travel was banned. The potential economic impact from this new variant will predominately depend on the level of government action.

Headline equity indexes saw aggressive 2-4% moves on Friday 26th, but underneath there was significant dispersion in stock performances. Unsurprisingly, airlines and companies connected to international travel were hardest hit, followed by leisure stocks. Conversely, healthcare shares, particularly those connected to vaccine manufacture performed well. While there is clearly a notable downside scenario, it is also important to consider that this variant may be less harmful than others, and any market moves could be swiftly reversed.

Outside of equities, fixed income markets sought to price in this new risk. Bond yields fell, particularly at the short end, reflecting expectations that flagged interest rate rises will be postponed. The potential impact to longer term growth and a flight to safety also caused longer dated bond yields to fall. This shifts the spotlight to the upcoming Bank of England meeting in December, where the market had been expecting a rate rise announcement. The balance in favour of a rate rise was already narrow and the addition of new restrictions that may impact economic growth could swing the committee back towards holding rates steady at the historic low of 0.1%.

The fund has remained 100% fossil divested throughout, avoiding investments in the production or extraction of coal, oil (including tar sands) and gas (including fracking). Secondly, the fund has maintained an exposure to at least 10% in renewable energy, with 14.8% at the end of November. Thirdly, the fund has a carbon-neutrality objective with a focus on promoting a net-zero economy by 2030. The fund targets that at least 25% of assets shall meet this objective initially (January 2021), rising to 85% of the portfolio by 2030. At the end of November, 27% of fund assets met the carbon-neutrality objective.

We continued our efforts to encourage fund managers to adopt investor targets promoting net-zero by 2030 through the NZC10 and NZC20 investor targets (<https://netzerocarbon.earth/>). We are pleased to see that over £10 billion of assets in specific funds have now adopted either NZC10 or NZC20. Net zero targets necessarily imply offsetting. Our analysis of different offset types to identify those which are most likely to contribute to climate stability has been accepted for the AGU (American Geophysical Union) December 2021 Meeting .

TM P1 Sustainable World Fund

* The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF excludes portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term.

** These are the annual costs of running and managing the Fund.

Risk Warnings

The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved. Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

The Fund has a concentrated portfolio (holds a limited number of investments) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.

Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

Important Information

P1 Investment Management Limited is authorised and regulated by the Financial Conduct Authority, Firm Reference Number 752005. P1 Investment Management Limited's registered office is Senate Court, Southernhay Gardens, Exeter, Devon, EX1 1NT, company number 09810560. This document does not constitute an offer or invitation to invest, nor should its contents be interpreted as investment advice, for which you should consult a financial adviser. The information and opinions contained herein have been compiled or derived from sources believed to be reliable at the time of publication and are given in good faith. No representation is made as to the accuracy, completeness or correctness of any information in this document.

Any opinion expressed, whether in general, on the performance of individual securities, or in a wider economic context, represents the views of P1 Investment Management Limited at the time of publication and these views are subject to change.

The KIID and Fund Prospectus are available from P1 Investment Management Limited on request.

Benchmark Information: The comparator benchmark is the Investment Association Mixed Investment 40-85% Shares. The Investment Association Mixed Investment 40-85% Shares is an industry standard benchmark and is one of the leading representations of mixed asset funds. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

The Authorised Fund Manager is Thesis Unit Trust Management Limited, Exchange Building, St John's Street, Chichester, West Sussex, PO19 1UP. Authorised and regulated by the Financial Conduct Authority.
