## Investment Objective

The Fund will aim to deliver income and capital growth, net of fees, on a total return basis whilst providing investors with exposure to a diversified portfolio invested in an ethically conscious way following the Investment Managers' ethical investment policy.

Investors should be aware that there is no guarantee that this objective will be achieved and capital is at risk.

The Fund may invest in a broad range of asset classes including fixed interest (approx. 10-40%) e.g. corporate & government bonds (which may include investment and sub-investment grade bonds), debentures and equities (approx. 50-80%). The Fund may also invest in property REITs as well as money market instruments, deposits, warrants, cash and near cash. Exposure to these asset classes (between 80-100%) will be gained primarily through the use of collective investment schemes although the Fund may also invest directly.

In addition, the Fund will aim to support enterprises who are actively working to address global warming issues, as detailed in the "Non-Financial Objectives" below.

## Non-Financial Objectives

The Fund will invest in assets that meet the requirements of the Investment Managers' ethical investment policy. The ethical investment policy seeks to identify funds or direct investments subject to robust ethical investment policies. Funds and directly held assets must pass a due diligence process designed to assess their ethical credentials. For funds, ethical due diligence includes: collection of documents from the fund provider explaining the process and policies used by the fund manager; fund manager interview; follow-up actions. Areas covered include: adherence to minimum requirements; assessment of exclusions; assessment of engagements carried out; assessment of other policies used (including but not restricted to best-in-class approaches, positive screening, integrated ESG approaches, impact investing approaches); commitment to ethical and sustainability issues; experience and qualifications of fund management staff; evidence supporting fund manager claims; follow up information provided.

The Investment Manager's ethical investment policy is subject to continuous improvement under the guidance of our external ethical oversight committee.

The Fund will aim to support companies who are actively working to address global warming issues. It will do this by focusing on fossil divested investments, renewable energy assets, and through investment in funds that lead companies to achieve net-zero emissions.

Measure	Definition	Target	Status
Fossil divestment	Percentage of fund assets in fossil divested investments	100% at launch and thereafter	100%
Investment in renewable energy	Percentage of fund assets invested in renewable energy assets	10% at launch and thereafter	14.3%
Leading companies to achieving net zero emissions as quickly as possible	Percentage of fund assets invested in funds that have adopted the carbon-neutrality objective below, or an objective we consider to be equivalent, or better. The carbon-neutrality objective has a focus on promoting a net-zero economy by 2030.	25% at launch and thereafter, rising to 85% by 2030.	27.3%

## Team Bio

Quintin has worked for actuarial and investment consultancy firms as well as a multi-national European bank for nearly ten years including wide experience in quantitative fund and risk analysis. He is a Fellow of the Institute of Physics, a Chartered Fellow of the Chartered Institute for Securities and Investments and a Chartered Wealth Manager. Quintin has completed the Sustainable Investment Professional Certification (SIPC) becoming this programme's second graduate in the UK.

Quintin Rayer

Will achieved an MSc in Finance and Investment from the University of Exeter and an Accounting and Finance BSc from the University of Bath. He has subsequently gained the Chartered Institute of Securities and Investments' Chartered Wealth Manager qualification. Will's talent is recognised by Citywire having been named as one of the Top 30 investment managers under the age of 30 five years in a row.

Will Dickson

## Fund Update

Following persistent selling since the start of the year, equity markets saw positive returns in March, regaining a significant proportion of the drawdown. While the key concerns are still very much present, investors have been keen to look through to the impact on corporate earnings, which remain broadly positive, and in aggregate little effected. The Russian invasion of Ukraine, resulting sanctions and ongoing developments have added significant volatility across a number of markets. The clearest impact has been on commodities. Extreme volatility in addition to higher prices will add to inflation, both directly through pump and utility prices for consumers, but also through supply chains, which will be stickier. Energy prices therefore continue to exacerbate the existing issue of inflation.

While some central banks have tempered their guidance for interest rate increases, the outlook remains for tighter monetary policy going forward. The Bank of England and the Federal Reserve both announced rate rises in March and guided for more in the coming months. Interest rate rises have direct implications on fixed income markets, although it is the change in market expectations for monetary policy that will drive movements. With markets pricing in a significant number of interest rate rises over the coming year, there is the potential for disappointment. Central banks now have the unenviable task of attempting to tame inflationary pressures, driven predominately by external factors, and supporting growth.

The market risks from COVID have been waning over the last couple of months, driven by looser government regulation, improved healthcare solutions as well as the more favourable traits of the Omicron variant. However, an outbreak in China, where a zero COVID policy remains in place, has driven some selling. With the highly infectious nature of the Omicron variant there is a risk that even extreme measures are unable to reduce its spread, and a significant amount of economic damage may be caused in attempting to do so.

The fund continues to remain diversified across asset classes and geographies. Within fixed income, short duration assets have remained our preference, however, as yields rise, we will naturally look to add to longer duration assets. We have continued the strategic reduction of UK equities, taking opportunities as they arise to move towards a more international equity allocation. While they have been highly beneficial so far this year, renewable infrastructure holdings continue to be tactically overweight. These assets provide a natural hedge against current high energy prices as well as longer term inflation, with income and dividends linked to overall price increases.

## Asset Allocation

### 14.3% Renewables

- 6.6% Greencoat UK Wind
- 6.6% Bluefield Solar

- 6.3% Artemis Positive Future
- 4.0% Federated Hermes Sust Global Equity
- 3.4% Alquity Asia

# TM P1 Sustainable World Fund

\* The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF excludes portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term.

\*\* These are the annual costs of running and managing the Fund.

## Risk Warnings

---

The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved. Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

The Fund has a concentrated portfolio (holds a limited number of investments) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.

Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

## Important Information

---

P1 Investment Management Limited is authorised and regulated by the Financial Conduct Authority, Firm Reference Number 752005. P1 Investment Management Limited's registered office is Senate Court, Southernhay Gardens, Exeter, Devon, EX1 1NT, company number 09810560. This document does not constitute an offer or invitation to invest, nor should its contents be interpreted as investment advice, for which you should consult a financial adviser. The information and opinions contained herein have been compiled or derived from sources believed to be reliable at the time of publication and are given in good faith. No representation is made as to the accuracy, completeness or correctness of any information in this document.

Any opinion expressed, whether in general, on the performance of individual securities, or in a wider economic context, represents the views of P1 Investment Management Limited at the time of publication and these views are subject to change.
