## Investment Objective

The Fund will aim to deliver income and capital growth, net of fees, on a total return basis whilst providing investors with exposure to a diversified portfolio invested in an ethically conscious way following the Investment Managers' ethical investment policy.

Investors should be aware that there is no guarantee that this objective will be achieved and capital is at risk.

The Fund may invest in a broad range of asset classes including fixed interest (approx. 10-40%) e.g. corporate & government bonds (which may include investment and sub-investment grade bonds), debentures and equities (approx. 50-80%). The Fund may also invest in property REITs as well as money market instruments, deposits, warrants, cash and near cash. Exposure to these asset classes (between 80-100%) will be gained primarily through the use of collective investment schemes although the Fund may also invest directly.

In addition, the Fund will aim to support enterprises who are actively working to address global warming issues, as detailed in the "Non-Financial Objectives" below.

## Non-Financial Objectives

The Fund will invest in assets that meet the requirements of the Investment Managers' ethical investment policy. The ethical investment policy seeks to identify funds or direct investments subject to robust ethical investment policies. Funds and directly held assets must pass a due diligence process designed to assess their ethical credentials. For funds, ethical due diligence includes: collection of documents from the fund provider explaining the process and policies used by the fund manager; fund manager interview; follow-up actions. Areas covered include: adherence to minimum requirements; assessment of exclusions; assessment of engagements carried out; assessment of other policies used (including but not restricted to best-in-class approaches, positive screening, integrated ESG approaches, impact investing approaches); commitment to ethical and sustainability issues; experience and qualifications of fund management staff; evidence supporting fund manager claims; follow up information provided.

The Investment Manager's ethical investment policy is subject to continuous improvement under the guidance of our external ethical oversight committee.

The Fund will aim to support companies who are actively working to address global warming issues. It will do this by focusing on fossil divested investments, renewable energy assets, and through investment in funds that lead companies to achieve net-zero emissions.

Measure	Definition	Target	Status
Fossil divestment	Percentage of fund assets in fossil divested investments	100% at launch and thereafter	100%
Investment in renewable energy	Percentage of fund assets invested in renewable energy assets	10% at launch and thereafter	14.8%
Leading companies to achieving net zero emissions as quickly as possible	Percentage of fund assets invested in funds that have adopted the carbon-neutrality objective below, or an objective we consider to be equivalent, or better. The carbon-neutrality objective has a focus on promoting a net-zero economy by 2030.	25% at launch and thereafter, rising to 85% by 2030.	26.9%

## Team Bio

Quintin has worked for actuarial and investment consultancy firms as well as a multi-national European bank for nearly ten years including wide experience in quantitative fund and risk analysis. He is a Fellow of the Institute of Physics, a Chartered Fellow of the Chartered Institute for Securities and Investments and a Chartered Wealth Manager. Quintin has completed the Sustainable Investment Professional Certification (SIPC) becoming this programme's second graduate in the UK.

Quintin Rayer

Will achieved an MSc in Finance and Investment from the University of Exeter and an Accounting and Finance BSc from the University of Bath. He has subsequently gained the Chartered Institute of Securities and Investments' Chartered Wealth Manager qualification. Will's talent is recognised by Citywire having been named as one of the Top 30 investment managers under the age of 30 five years in a row.

Will Dickson

## Fund Update

June saw a continuation of the market weakness experienced since the start of the year. Global equities posted negative returns of over 4%, taking year to date losses for some major indices to over 20%, the widely used measure of a bear market. While drawdowns of this magnitude are generally seen every several years, the duration of the selloff, now lasting close to six months, is the longest since the global financial crisis.

Equity market weakness was once again driven by movements in bond markets and monetary policy expectations. High and rising inflation readings continue to spook investors and central bankers alike. The Federal Reserve met higher expectations, implementing a 0.75% interest rate rise with the Bank of England opting for another 0.25% increase a day later, taking headline rates to 1.75% and 1.25% respectively. Expectations for future rate rises have also increased, with further risks to the upside.

Over the month, fears of a significant economic slowdown, or recession, grew. Weakening consumer sentiment, persistent cost pressures for businesses as well as the unwinding of a major inventory build-up are all aligning to suggest economic weakness in the second half of the year. Equity investors are therefore beginning to focus on corporate earnings and the sustainability of these when margins are under pressure and demand is weakening. However, some positives have arisen with this outlook. Energy and other commodity prices have softened significantly, which, if they persist, will bring inflation down more rapidly than previously anticipated. Some are finding solace that this may ease the vigour of Central Bank rate rises, constrain the rise in bond yields and ultimately be supportive for equity valuations.

Within the fund we continue to maintain our positioning, with few fundamental changes over the month. We have added slightly to duration within fixed income, taking advantage of widening yields to slightly unwind the short duration positioning currently in place. If yields continue to rise, we will look to extend this positioning. Over the coming month, we are excited to announce that the OCF cap, that is currently implemented at 1.50%, will be reduced to 1.05%. This will be a significant and ongoing cost saving to existing and new investors.

# TM P1 Sustainable World Fund

\* The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF excludes portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term.

\*\* These are the annual costs of running and managing the Fund.

## Risk Warnings

---

The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved. Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

The Fund has a concentrated portfolio (holds a limited number of investments) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.

Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

## Important Information

---

P1 Investment Management Limited is authorised and regulated by the Financial Conduct Authority, Firm Reference Number 752005. P1 Investment Management Limited's registered office is Senate Court, Southernhay Gardens, Exeter, Devon, EX1 1NT, company number 09810560. This document does not constitute an offer or invitation to invest, nor should its contents be interpreted as investment advice, for which you should consult a financial adviser.
